

```
Claude Code v2.1.228
Opus 5 (1M context) with high effort · API Usage Billing
~/Desktop/Loom

Tackle your toughest work with Opus 5. Switch anytime with /model.

Not logged in · Run /login

>
>> auto mode on (shift+tab to cycle) · ← for agents
```

This is how the interface should look when the i launch my software in the project directory terminal I'll give assests for animations in the terminal later for now fill the asserts which you like

```
/bug          Report a bug or share your conversation
/cd           Move this session to a new working directory
/clear        Start a new session with empty context; previous session stays on disk (resumable with /resume)
/color        Set the prompt bar color for this session
/compact      Free up context by summarizing the conversation so far

> /
>> auto mode on (shift+tab to cycle)
```

```
/auto-mode-setup  Teach auto mode about your environment, plus optional rule tweaks
/autocompact      Set how full the context gets before auto-summarizing
/background       Send this session to the background and free the terminal
/branch           Create a branch of the current conversation at this point
/btw             Ask a quick side question without interrupting the main conversation

> /
>> auto mode on (shift+tab to cycle)
```

```
/claude-api       Reference for the Claude API / Anthropic SDK - model ids, pricing, params, streaming, tool use, MCP, agents, caching,
                  token counting, model migration. TRIGGER -- read BEFORE opening the target file; don't skip because it "looks like a one-...
/add-dir          Add a new working directory
/advisor          Let Claude consult a stronger model at key moments
/agents           (removed) Ask Claude to create/manage subagents, or edit .claude/agents/

> /
>> auto mode on (shift+tab to cycle)
```

When “/” is typed it should get options where user can will have idea about options and the features

```
Claude Code v2.1.251
Opus 5 (1M context) with high effort · API Usage Billing
~/Claude/Projects/Prism Earth

Updated to latest. Got 68 features, 362 bugfixes, and 195 other changes.
code.claude.com/docs/en/changeLog for details

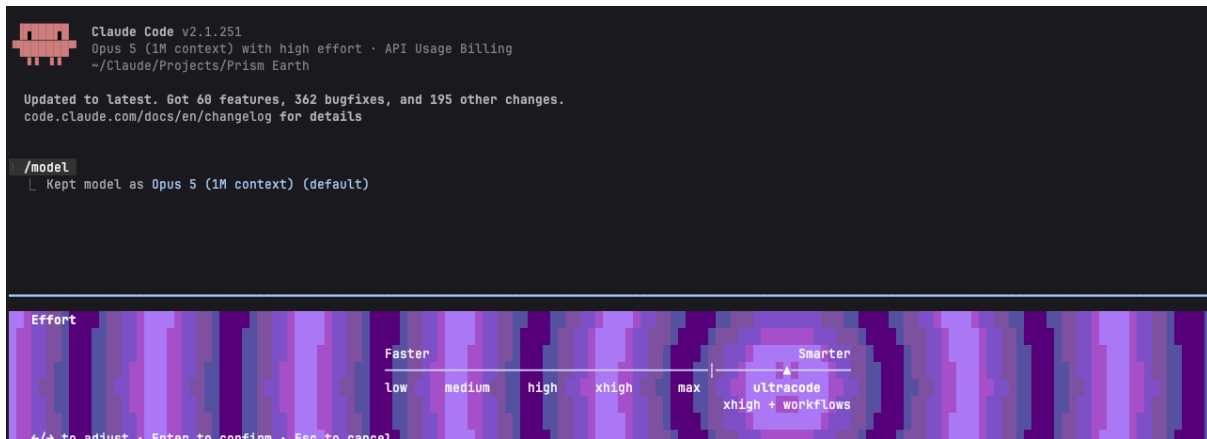

Select model
Switch between Claude models. Your pick becomes the default for new sessions. For other/previous model names, specify with --model.

> 1. Default (recommended) ✓ Use the default model (currently Opus 5 (1M context)) · $5/$25 per Mtok
  2. Opus (1M context)       Opus 5 with 1M context · Best for everyday, complex tasks · $5/$25 per Mtok
  3. Fable                  Fable 5 · Most capable for your hardest and longest-running tasks
  ↓ 4. Sonnet               Sonnet 5 · Efficient for routine tasks · $2/$10 per Mtok
    ... +1 model

● High effort (default) +/- to adjust

Enter to set as default · s to use this session only · Esc to cancel
```

It should get options when particular option was chosed

Try to include animations like this which are very interactive

When “/” is typed in the terminal it should also give the user which phase to start with if the software has any doubts it should ask user through the terminal of now you have clear idea what i exactly want to build as you know entire about the claude code using terminal so all the features of it which can be implemented in my software

Right now we'll just use local implementation later we need go product release the user need to keep track of api tokens which he is using for the we'll create a website where he can check his usage and limits and verified account so that he can use our software by using signup and signin
